SHRI RAJUBHAI A. PARMAR:

Will the Minister of STEEL be pleased to state:

(a) whether it is a fact that India is emerging as a large seller and exporter of steel;

(b) if so, the demand, consumption and production figures of steel in the country during 1995-96 and the preceding three years; and

(c) the countries to which steel exports during the ensuing year are targetted, indicating the likely amount of exports to each of them?

THE MINISTER OF STEEL AND MINISTER OF MINES (SHRI BIRENDRA PRASAD BAISHYA): (a) Yes, Sir. Steel exports from India have shown a quantum increase in recent years. During the years 1994-95 and 1995-96, 1.3 million tonnes and 1.5 million tonnes respectively of saleable steel was exported by India.

(b) The apparent consumption of steel in a year is the actual demand in that year. Apparent consumption of steel is arrived at by subtracting export of steel from the total domestic production and import of steel in the country. Change in stock is also adjusted in arriving at the consumption figures. The apparent con-

sumption and production of finished steel in the country during the last 4 years was as under:

(Qty. in Million Tonnes)

Year	Apparent consumption	Production
1992-93	15.00	15.20
1993-94	15.32	15.20
1994-95	18.66	17.82
1995-96	21.65	21.40

(c) Export of steel and its destination depend on several factors such as domestic and international demand, domestic prices, steel prices in importing countries etc. These factors are usually dynamic and change frequently. Countries to which steel is exported from India include China, Japan, USA, Korea, Taiwan, Indonesia, Thailand, Malaysia, Sri Lanka, Nepal, Australia and Germany.
